

UJJWAL BASNET

Procurement Officer | Supply Chain Enthusiast

• uzzalbasnyat@gmail.com • [linkedin.com/in/uzzal-basnyat](https://www.linkedin.com/in/uzzal-basnyat) • Kathmandu, NP

Summary

Accomplished Procurement Officer with over eight years of experience in inventory management and purchasing goods in high-volume business environments. Proficient in creating and managing complex bills of materials (BOMs) and Manufacturing modules using the Odoo ERP system. Highly skilled in purchasing, procurement and inventory management, ensuring accurate inventory levels and efficient asset management. Known for creating excellent transparency in workflows between teams, strong problem-solving abilities and fostering strong stakeholder relationships. I excel at enhancing operational efficiencies, inventory accuracy and optimizing procurement processes.

Experience

Mahavir Shree International Pvt. Ltd.

Kathmandu, Nepal

Procurement Officer

Apr 2024- Present

- Lead the end-to-end sourcing cycle for government airport tenders; covering ICT, construction, electrical and mechanical work packages, while keeping bids within stipulated budget ceilings.
- Identify, pre-qualify and negotiate with OEMs, authorized distributors and specialist contractors; benchmark market prices; and secure supply agreements that minimize risk and optimize total cost of ownership.
- Compile, verify and file all compliance documents (manufacturer authorizations, technical data sheets, ISO/CE/FCC certificates, material test reports, shop drawings, warranty statements) to keep every bid dossier 100% audit-ready.
- Issue purchase orders post-award, track lead time and coordinate just-in-time deliveries with site teams to maintain project schedules.
- Collaborate closely with civil, electrical, mechanical, IT, finance and compliance departments to balance technical conformity, cost targets and contractual obligations for on-time bid submission and smooth project execution.

Senior Procurement Assistant & Assets Control Officer

Jun 2017 – Apr 2024

Assets Control Officer

Apr 2019 – Apr 2024

- Monitor and manage all project assets, ensuring accurate logging and utilization within the asset management system.
- Collaborate with cross-functional teams to improve asset management processes.
- Regularly audit physical and financial tracking of assets to improve assets management.

Key Achievement:

- Implemented Kaizen Asset Management Software.
- Manually created and entered data for more than 4,100 assets into the AMS software.
- Created an efficient methodology for the asset management process, reducing errors and achieving 96% error-free work in the 2080/081 fiscal year.
- Worked on asset accounting books to remove assets that were lost, scrap or sold and provided data to the accounting team for the entry of new assets into the fixed assets register.
- Worked on the write-off of assets from the company's books, removing over NPR 1 crore equivalent of assets from an opening total value of NPR 10 crore.

- Oversee all project-related requisitions to effectively manage and optimize inventory levels.
- Construct and manage detailed BOMs for projects, enhancing coordination and efficiency across sales operations.
- Execute quarterly inventory verifications and monthly audits, maintaining precise records and identifying areas for improvement.
- Develop and maintain strong relationships with key stakeholders, including buyer teams, engineers, and project managers, ensuring that all procurement activities are strategically aligned with overarching project goals.
- Managing the supply chain of subsidiary companies, handling manufacturing orders, producing essential oils through Odoo ERP and providing guidance to sales and accounting teams on intercompany sales.

Key Achievement:

- Increase transparency within inventory work flow.
- Reduce the requisition inaccuracy by 45%.
- Worked on direct creation of sales orders and bill of materials to eliminate traditional processes. This streamlined the workflow by reducing the need for returning all products-per-project, simplifying sales orders creation and improving efficiency in generating invoices.
- Implement requisitions status tracking process.
- Reduced inventory deficiency from 71% to 93% during the 2080/081 fiscal year.
- Completed the inventory ABC classification.
- Worked on removing over NPR 5 crore worth of dead stock from the total inventory valuation of NPR 23 crore.

Closing Statement

This CV highlights my comprehensive experience, qualifications and achievements in procurement, inventory management, asset management and overall supply chain management. However, my capabilities extend beyond what's detailed here. I am proficient in data analysis with advanced skills in using LibreOffice Calc, Excel and Google Sheets for data cleaning and analysis. I have pretty good knowledge of Python and experience with libraries such as Pandas and NumPy for data analysis and Matplotlib for data visualization. Beyond these, I also work as a freelance security analyst, primarily focusing on identifying vulnerabilities in web applications through a manual testing approach.
